| Playing mind games (also power games or head games) is the largely conscious struggle for psychological one-upmanship, often employing passive–aggressive behavior to specifically demoralize or dis-empower the thinking subject, making the aggressor look superior. It also describes the unconscious games played by people engaged in ulterior transactions of which ... Lean Six Sigma Black Belt training will bring both Green and Black belt participants together ensuring consistent Green Belt level knowledge in the principles and practices of Lean and Six Sigma. Black Belt participants will return for a deeper dive into the Lean and Six Sigma methodologies and bring the participant to the level of Black Belt. British Journal of Clinical Psychology; British Journal of Developmental Psychology; British Journal of Educational Psychology; British Journal of Health Psychology.
| Transactional Analysis (TA): Transactional Analysis (TA) is yet another training method to develop interactive and communication skills among trainees. It was developed by Eric Berne in the 1950's. Contributions by Harris and Jonge-ward too have made their contribution to further enrich the TA Theory. This training is appropriate for veteran managers to refresh and enhance basic financial analysis skills, and for those newer to the automotive industry or their position. In this course, students will experience instructor-led interactive discussion, department ... Transactional Analysis helps you learn from past decisions and make smarter decisions in the future. Every work is based on a contract / agreement: This does not necessarily mean a written contract. Transactional Analysis uses accords to create clarity and avoid misunderstandings. Contract work can be a simple arrangement.
| Sep 12, 2018 · It's a time for practical walkthrough of setting up a basic transactional SQL Replication system.
